

Woman's sexual fantasy

Men underestimate because they are brought up in a sexist society dominated by false teachings passed down from father to son; an event that leads them to believe that they are in charge of women, coming to be unaware of the true meaning of love.

In our short slideshow, we will expose real data collected in psychology offices, surveys, polls and social networks; showing the deepest feminine fantasies.

Final Thoughts

Our short expository work presents a summary of the behavioral study of women's sexuality, showing the fantasies that they are inclined to, in the same way that men follow their sexual tendencies. Although many believe that they are in charge and have the power to suppress the emotions of their mates, especially those who are sick with jealousy; No one can get into the mind of his fellow man, especially into the minds of the girls that everything happens; So boys must learn this lesson and every day conquer their partner, dedicating themselves to sex as if it were the first time.

Our work presented real photos, not with the aim of promoting pornography, because the world is completely saturated with this filth; However, the purpose is to expose in a clear and simple language, narrating as much of reality as possible, so that it is registered in the minds of all readers.

You're not alone!
