We will look at the behavioral changes within human sexuality that are happening in the present day.

Our theme is an academic content, prepared with responsibility, aimed at people who do not know the reality behind the scenes of sexuality outside of traditional marriage, instituted by God.

We will expose explicit photos that do not aim to promote pornography, but rather bring as close as possible to reality the certain sexual situations that people are involved in, and unconsciously lead to a total destruction of the family, society and the individual salvation of the home practitioner of these modalities.

We are presenting a psychological, sociological, anthropological and theological analytical summary of each situation in an impartial way, not enticing readers to follow a particular religious line; Rather, it shows that everyone has a body and soul, which is eternal, so that inappropriate behavior will have serious eternal consequences.

Lasciviousness

Lust - sensuality, libidinity, lust. It is a characteristic of those who have shamelessness, who have libertine, libidinous manners, who have a propensity for sensuality. In the current context, all spheres of society are plagued by this practice, with social networks being the main mechanism for dissemination.

There is a large number of people who do not use social media; But, they are not immune to this practice, since we are the parents of carnival, nudist beaches and the various means of promoting sensual events linked to fashion parades and even in civic parades we can observe the girls showing their private parts sharpening the erotic instinct that every human being inclines to feed the deepest sexual desires.

Swing Couple

Swinger Sex / Couple Swap - It is a relationship between two stable couples, as a recreational activity; sex with people. Sexual modality that has an alarming growth every day; Sympathizers get their initiation through pornography and over time put it into practice.

It's routinely happening in secret clubs as it used to be in the beginning, but some couples are interacting with each other in the anonymity of the tenants or at home, co-workers and even family members, cousins and in the case of brothers-in-law.

Although the exchange and couples have a select clientele of the middle and upper class, those who are below the social pyramid, have sought peculiar ways according to purchasing power and have been on the rise in the last 05 years.

We are not instigating anyone to engage in this type of behavior, nor are we condemning these couples; However, as our research is academic; We expose people's behavioral change in the present century.

Suruba

Suruba - Erotic party, where men and women participate, all with sexual interest. At this party, all members are allowed to have sex with all the people they can handle.

Many get frustrated because they think about entering a suruba to have sex with an elegant man or woman, and they are often not accepted by them, being a completely different environment from the one presented by basic social media pornography. Another fact that many are unaware of is the issue of the environment not having a pleasant smell, and no matter how much it sanitizes, as it is about many people expectorating fluids and pain, it is certainly inconvenient, especially the issue of a man having access to the sperm of another who has just ejaculated on a woman.

As much as people try to make up free sexuality, behind the scenes there is depression, anguish and often STD contamination. Sexually Transmitted Diseases.

Gang Bang

Gang Bang - Sex between a group of people, where the men penetrate a partner, and the others caress her body. That is: The whole group has the obligation to generate pleasure, in just one person who is being aroused, until orgasm.

Men who enjoy cuckold tend to want to see their partner in this sexual modality. This is not a married fantasy, single women practice it too. Incredibly, many single men even marry these women. The truth is that we don't know what's going on in the minds of people in the present time; Behind the scenes of these anomalies is something great that humanity has not yet realized.

On six open dating sites, we had the number of:

29214 – Couples who are practitioners of Gang Bang

Dogging

Dogging - The practice of sex in public places; An action that involves a lot of adrenaline, because it is an outlaw sex, as it is a public act with the possibility of strangers not only observing, but also interacting, touching and even penetrating the woman. A very dangerous fetish because, in addition to the exposure with the risk of being leaked, the images and posted on social networks can reflect on the couple's personal and professional life, in addition to the censorship of family members. It is not known why people turn to Dogging, but everyone has the right to exercise their sexuality according to the individuality of their desires. With this quote I am not enticing anyone to this form of having sex, since it is a criminal act, an attack on modesty.

Sadomasochism/ BDSM

Sadomasochism - (BDSM - Bondage, Discipline, Sado-Masochism) Refers to the relationship between different people seeking pleasure in pain. The term sadomasochism would be the relationship between opposing tendencies; sadism and masochism. It is the giving or receiving of pleasure through acts that involve the receiving or application of physical and moral pain. The term sadomasochism is a portmanteau of two opposing tendencies, sadism and masochism. The abbreviation S&M is often used to refer to sadomasochism.

Sex is a gift from God, and was created for human reproduction, in addition to the joy, pleasure, and satisfaction of the couple; And the act of producing torture and pain is an unhealthy behavior that should not happen during coitus. A person of sound mind will never produce or allow himself to feel pain during the intimate moment of sex.

Certainly, we will come across people who, due to some past trauma, have started to suffer from psychological disorders which lead them to take pleasure in pain. They deserve to be loved and respected, because they are not to blame for the process they are conditioned by. But they need treatment because they continue to be victims of their hidden desires that generate pain and suffering.

Polyamory

The "Polyamory" every day gains followers with a lot of determination, we can compare these people with the children who arrive at the Walt Disney theme park, and begins to enjoy compulsively in all the rides, as if there was no tomorrow.

Polyamory is a form of conjugality, in an open relationship in which the parties have affective and sexual relationships with several people at the same time (a type of). They do not follow monogamy, since they allow themselves to enjoy love bonds in a collective way.

At first glance, it looks like a very good thing; Imagine having sex with other people and not having to go through a rebuke or reproach. But there is another avenue of access which men want to ignore, and there is no way to get rid of it; this is because they were moral and spiritual values imposed by God that must be respected, because everything in the universe has rules and limitations. It is enough to observe that the stars do not collide with each other, the sea does not exceed the limits of the beach, at each dawn a new day is foreshadowed and several other examples that we can see in nature.

Sexting

Sexting - It is a phenomenon in which teens and young people use social networks, apps, and mobile devices to produce and share nudity and sex images. It also involves erotic text messages with sexual invitations and innuendos to boyfriends, suitors, and/or friends. However, married adults have adapted this practice to the relationship; Some use it when they are traveling and interacting with their spouse who is at home.

However, most present this opportunity for marital infidelity, accessing relationship sites that offer this platform, and incredible as it may seem, the number of married women who are adhering to this practice is alarming, arguing that it uses to get out of the routine of the relationship, without having carnal contact with another man, only having orgasm through images of handsome men with large members.

The biggest problem is the possibility of leaks of this information on social networks, since there is the probability of someone invading the personal equipment and promoting a great damage to the marriage.

Being practiced in secret from the spouse, it becomes an intellectual or emotional infidelity.

The End

Final Thoughts

Our short expository work presents a summary of behavioral studies on human sexuality, carried out in the last ten years; it has an academic character for professionals, students and curious people who want to know the backstage of the fetishes and fantasies that every human being inherits in their genetics; But they don't share it for fear of censorship and social discrimination.

It is not to say that the behavioral manners presented are correct and deserve applause and approval; yet people have human nature inclined to perversions, so that one fits into one conduct, and does not approve of the other, so that if there were no eternal consequence or punishment in the material realm, surely the world would be a great extension of Sodom and Gomorrah.

Take advantage of each slide with the content exposed and do some self-reflection to know if this is what you want for your life.
